week 10	add your tasks and assign them to a team member					
	Update report		y	All		
	sitemap updated		y	Alexander, Tristan		
	design board updated		y	tristan		
	navbar improvement		y	Alexander		
	procedural navbar (change one file change it on every page)		y	Andrei		
	javascript buttons to hide		y	Derek		
	Let Emer know if someone is out of contact			everyone present and contributing as of 22/11/2025		
week 11	add your tasks and assign them to a team member					
	functionality= what does the page do? and does it do it well?			All		
	form validation on each page			All		
	Let Emer know if someone is out of contact					
week 12	finish up code					
	deploy website					
	testing – functional testing, speed test					
	Write/record report					
	only one CSS file – if possible more marks					
	testing menu links work					
	comments in HTML, CSS and JS					
	Make sure the author name is on each webpage					
	everyone has DOM manipulation on their own webpage					
Submission	SUNDAY					
	decide who does this					
	Andrei Derek Tristan Alexander					

Team Menbe	Tasks		Completed	Notes/comments/blockers
Tristan	Footers to be added to pages		COMPLETED	completed by derek and andrei
Tristan	css page to be merged with main css pages		COMPLETED	Completed by derek
Derek	fix cover page picture on report		COMPLETED	pfd created
Andrei	checkpoint 2 uploaded Sunday night		In-Progress	Check point pdf created and uploaded
Alexander	js scrips completed and Css file merged with main css		In-Progress	Script for footer to be Changed to reflect a sticky/absloute postion at bottom of page
All	Discission needed on what to actully put in website if anything or do we do loruem ip:		To Be Started	What research needs to be done
All	Discission needed on forms and DOM to be inpemented		To Be Started	Elemets that make sense for a website or just show functionality
Alexander	Update needed on progression with pages		In-Progress	???

Notes:

- Everyone needs two pages no less
- One CSS file only
- Comment CSS to identify who made it
- Two wireframes per page each: desktop and mobile
- One sitemap per group
- Colour palette:
- GitHub commits have to be spread evenly

Grade Breakdown

LEGEND➔ ==Done==

==Must do==

==Critical==

80-100%
Excellent & above Excellent evidence of design process, consistent with final website. Very well documented.

Excellent project management demonstrated. Deliverables submitted on time.

Any feedback was clearly taken on board and incorporated to an excellent degree.

==GitHub link== showing ongoing regular commits over the project duration==, has used gitbash or git Gui successfully.==
Excellent implementation of HTML elements, implemented excellently, working perfectly.

Demonstrates excellent advanced functionality.

==Excellent use of CSS in a single file.==
==Excellent use of JS in manipulation of the DOM & form validation==.

==Visually appealing and clear to users==. With informative comments.
Website is responsive with no visual errors using a responsive framework with extensive customisation==. With informative comments==.

==Navigation fully working==. Website deployed. Images optimised correctly.

==Validator== showing an excellent result.

==Optimisation demonstrated via Google Page Speed rankings== – excellent result. All excellently documented.
